

2022 CalVCB Regional Trauma Recovery Center (TRC) Pilot Program Special NOFA Narrative Qualifications

Please provide narrative responses that address the requirements of the Government Code sections related to the question.

Qualification 1

TRCs serve crime victims who typically are unable to access traditional services, including those who are homeless, chronically mentally ill, of diverse ethnicity, members of immigrant and refugee groups, disabled, experiencing severe trauma-related symptoms or complex psychological issues, and juvenile victims, including youth who have been in foster care, or incarcerated. Describe the location of your satellite offices and the reasons you selected the service areas, including considerations such as applicable crime rates, social-economic conditions, availability of mental health and trauma services in the region, and adverse community impact if the proposal is not funded. (California Government Code (GC) section 13963.1)

Qualification 2

Please specify the local partner(s) you plan to collaborate with and targeted client populations to be served. Tell us why you selected the local partner(s) and the targeted populations, and why you believe the partnership will be successful. Provide examples of your organization's experience and ability to expand services to larger numbers of clients, and how you will apply that to the satellite offices.

Qualification 3

Please provide examples of your organization's experience or ability to provide TRC services to survivors of crime as well as family members of homicide victims, including, but not limited to, survivors of sexual assault, domestic violence, human trafficking, and physical assault. Describe how you will train up your chosen partner(s) to the TRC service model and provide an implementation timeline. (California (GC) section 13963.2)

Qualification 4

The TRC partnership is expected to be a community resource to law enforcement, community-based agencies, and other care providers on the identification and effects of violent crime. Describe how you will educate and train law enforcement, community-based agencies and other care providers in the areas served by the satellite offices. Describe your outreach plan. (California GC section 13963.2)

Qualification 5

Provide specific examples of evidence-based and evidence-informed mental health and support services your partnership will be offering that is not available or difficult to access in the proposed service area. Include details regarding specific treatment modalities that may be of specific benefit to the target populations. (California GC section 13963.2)

Qualification 6

The TRC partnership requires a multidisciplinary team of doctors, clinicians and caseworkers in a satellite capacity. Describe how you will ensure that the multidisciplinary team will partner with local agencies to assist with medication management, provide consultation, and assist with treatment to meet the clinical needs of victims. (California GC section 13963.2)
